

Intermediate Report Designer Class Agenda

A two-day instructor class

V.1 | 2017

Intermediate Report Designer Class

Summary

Our online Intermediate Report Designer class is a 3 hours per day, 2 day instructor led course.

This course is ideal for those who have attended to the Basic Report Designer class, and have been using their solution for a good period of time and are simply craving more! Your solution provides not only the basic analytical capability your organization needs, but can help you own every advanced analytical requirement.

In this session, we'll teach you the intermediate skills to leverage many advanced elements including:

- Complex analytics with nested functions
- Navigate time functions and unlock your views of yesterday, today and tomorrow
- Expand on your understanding of concepts like sets, calculated measures and use them to create POWERFUL analytics
- Start to ask "What If", "If/Then" and jazz up the formatting of those results
- And everything else a GURU needs to know!

This one investment will accelerate you MONTHS ahead on your learning curve towards an even more powerful deployment.
