

Don't let your financial data cause staff burnout...

Automated data management software delivers faster, more accurate financial reporting

Consolidating financial data is a recurring challenge, with seven major hurdles

Automated Data Integration

ZAP consolidates all your data automatically, so nothing is missed. Tasks that might have taken your finance team weeks or months are turned into instant, app-based clicks.

Easy reporting

ZAP prepares a central hub of data ready for efficient, accurate reporting and analysis with your chosen BI tool.

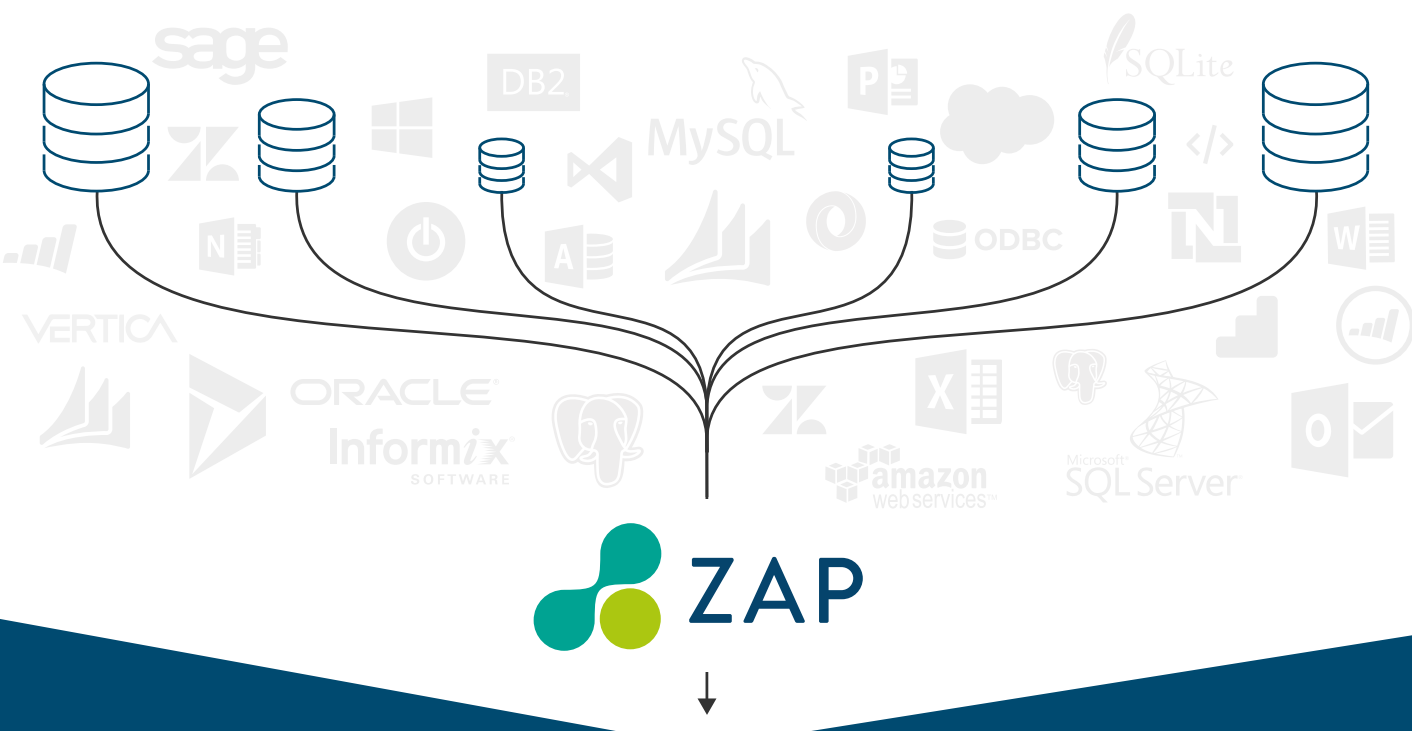

Intuitive data modeling

A simple UI makes it easy to prepare complex financial data for reporting, without the need for technical data experts.

Security and governance

ZAP automates, controls, audits and logs all aspects of data governance and security, from password and access control to reconfiguring mismatched data.

Connect your business with data

Your business data becomes unified and integrated into a secure, governed hub prepared for reporting and analysis with your preferred BI tool.

YOUR BI OF CHOICE

ASTON MARTIN

ZAP Data Hub is “a brilliant app that has helped cut down month end reporting from two weeks to three days.”

MATTHEW RANDALL, ASTON MARTIN
